<question>Read the paragraph and choose the correct answer.

Expats will find that the quality of healthcare in Kazakhstan is highly variable, especially in the public sector. Although the government has been making attempts to improve the level of service, the quality of public healthcare has fallen dramatically since the end of the Soviet era. The public healthcare sector is

chronically underfunded, and there are rumors that bribery and corruption have become rife among underpaid medical professionals.

<variant>Government works on improving the level of medical service

<variant>There is no public hospitals in Kazakhstan

<variant>Government doesn't work on improving medical service in Kazakhstan

<variant>Government doesn't finance Public hospitals in Kazakhstan

<variant>Medical workers get high wages

<question>Read the paragraph and choose the correct answer.

Public hospitals are easy to find in Kazakhstan, as around 70 percent of the country's hospitals are government- owned.

Although expats legally resident in Kazakhstan are entitled to use the public healthcare system, it's difficult to predict the quality of treatment. While some expats report receiving adequate to good care, others have noted that the standard of treatment is low with a constant shortage of medication and equipment.

<variant>It's easy to find public hospitals in Kazakhstan.

<variant>It's not easy to find public hospitals in Kazakhstan.

<variant>There is no public hospitals in Kazakhstan.

<variant>There is no private hospitals in Kazakhstan.

<variant>There are 50% of hospitals government owned.

<question>Answer the question.

What services can provide "Dermatology"?

<variant>skin disorders

<variant>heart disorders

<variant>general anesthesia or spinal block for surgeries and some forms of pain control

<variant>respiratory tract disorders

<variant>emotional or mental disorders

<question>Read the text and answer the question.

What should you do when you receive a medical services receipt from your healthcare provider's office?

You've just spent an hour at your healthcare provider's office, as you leave, you are handed a piece of paper. Your healthcare provider's medical services receipt will reflect everything that happened during your appointment and will order some or all of the follow-up tests or treatments that need to take place, too. On the receipt, you will find: your personal information including your insurance information. When the receipt is handed to you, you'll make sure it's yours and hasn't been mixed up with someone else's receipt. If you find a discrepancy, you'll need to work with your healthcare provider's office to correct your medical record.

<variant> Ensure that the receipt contains your information

<variant> Verify that the receipt belongs to someone else.

<variant> Only check the follow-up tests and ignore other details on the receipt.

<variant> Immediately throw the receipt away.

<variant> Ignore the receipt and leave the office.

<question> Define ends and odds line.

<variant> hospital, healthcare organization

<variant> office address, date of birth

<variant> phone number, home address

<variant> private e-mail, marital status

<variant> in case of emergency warn, surname

<question> Read the text and complete the sentence.

You've just spent an hour at your healthcare provider's office, as you leave, you are handed a piece of paper. Your healthcare provider's medical services receipt will reflect everything that happened during your appointment and will order some or all of the follow-up tests or treatments that need to take place, too. On the receipt, you will find: your personal information including your insurance information. When the receipt is handed to you, you'll make sure it's yours and hasn't been mixed up with someone else's receipt. If you find a discrepancy, you'll need to work with your healthcare provider's office to correct your medical record. Your medical record contains ...

<variant> medication

<variant> in-man study

<variant> preclinical trials

<variant> worksheets

<variant> checklists

<question> Read the text and answer the question.

You've just spent an hour at your healthcare provider's office, as you leave, you are handed a piece of paper. Your healthcare provider's medical services receipt will reflect everything that happened during your appointment and will order some or all of the follow-up tests or treatments that need to take place, too. On the receipt, you will find: your personal information including your insurance information. When the receipt is handed to you, you'll make sure it's yours and hasn't been mixed up with someone else's receipt. If you find a discrepancy, you'll need to work with your healthcare provider's office to correct your medical record. What should you do if you notice incorrect information on the medical services receipt after leaving the healthcare provider's office?

<variant> Notify your healthcare provider's office and correct with them your medical record.

<variant> Return to the healthcare provider's office immediately to demand a new receipt.

<variant> Contact your insurance company to correct your medical record..

<variant> If you find a discrepancy, ignore it, as it is not important.

<variant> Keep the receipt and correct the information yourself.

<question> Put the words to complete the text.

You've just spent an hour at your 1_____ office, as you leave, you are handed a piece of paper. Your healthcare provider's medical services receipt will reflect everything that happened during your 2_____ and will order some or all of the follow-up tests or 3_____ that need to take place, too. On the receipt, you will find: your personal information including your 4_____ information. When the receipt is handed to you, you'll make sure it's yours and hasn't been mixed up with someone else's receipt. If you find a discrepancy, you'll need to work with your healthcare provider's office to correct your 5_____.

<variant>healthcare/ medical record /treatments/insurance/ appointment

<variant>healthcare/ treatments/insurance / appointment/medical record

<variant>medical record /treatments/insurance/ appointment/ healthcare provider's

<variant>medical record /treatments / healthcare provider's/insurance/ appointment

<question>Read the text. Are these sentences true (T) or false (F)?.

You've just spent an hour at your healthcare provider's office, as you leave, you are handed a piece of paper. Your healthcare provider's medical services receipt will reflect everything that happened during your appointment and will order some or all of the follow-up tests or treatments that need to take place, too. On the receipt, you will find: your personal information including your insurance information. When the receipt is handed to you, you'll make sure it's yours and hasn't been mixed up with someone else's receipt. If you find a discrepancy, you'll need to work with your healthcare provider's office to correct your medical record.

1.	When you leave the doctor, you are handed nothing.
2.	If you find a discrepancy, you shouldn't go to your healthcare provider's office to correct your medical record.
3.	There is personal information including your insurance information in the receipt.

<variant>F/F/T

<variant>T/T/F

<variant>F/F/F

<variant>T/F/F

<variant>T/F/T

<question>Complete the sentence.

Emergency medical services ...

<variant>provide emergency care.

<variant>provide hospital care.

<variant>provide out-patient care.

<variant>provide exclusive care.

<variant>provide personal hygiene.

<question>Define odd and ends line.

<variant>deforestation, solar energy, pollution, trash
 <variant>purple foxgloves, pain, heart problems
 <variant>stomach problems, a fever, garlic,
 <variant>cinchona tree, lavender, pain, willow tree
 <variant>aloe vera, lemon and honey, pain

<question>Define odd and ends line.
 <variant>dangerous wastes, ozone layer, climatic changes
 <variant>heart problems, garlic, pain, willow tree
 <variant>stomach problems, a fever, purple foxgloves
 <variant>natural remedies, burns and cuts, sore throats
 <variant>sleeping problems, natural remedies, a fever

<question>Define odd and ends line.
 <variant>sore throat, garlic, heart problems, foxglove
 <variant>air pollution, water pollution, rainforests
 <variant>global warming, habitat, smog, land
 <variant>severely polluted, harmful substances, overcrowding
 <variant>resource depletion, garbage, environment

<question>Define odd and ends line.
 <variant>plant, mixture, natural medicine
 <variant>deforestation, solar energy, pollution
 <variant>severely polluted, harmful substances
 <variant>air pollution, water pollution, rainforests
 <variant>resource depletion, garbage, environment

<question>Define odd and ends line.
 <variant>willow tree, garlic, heart problems, foxglove
 <variant>resource depletion, garbage, waste
 <variant>ultraviolet rays of the sun harmful substances
 <variant>air pollution, greenhouse effect
 <variant>ocean trash, waste, forest fires, plastics

<question>Put the sentences in the correct order.

a.	Climate change, also called global warming , refers to a rise in the average temperatures on Earth.
b.	97% of scientists agree that climate change is happening and the main cause is from an increase, in greenhouse gases in the atmosphere.
c.	These trap the heat from the sun, which is making the Earth hotter.
d.	This is known as the greenhouse effect.
e.	Over the last few years, there has been more extreme weather events, like floods, droughts, wildfires and heat waves.

<question>Match the words to make correct collocations.

1. climate	a) warming
2. global	b) dioxide
3. renewable	c) transport
4. carbon	d) energy
5. public	e) change

<variant>1-e, 2-a, 3-d, 4-b, 5-c

<variant>1-c, 2-a, 3-d, 4-b, 5-e

<variant>1-a, 2-e, 3-b, 4-c, 5-d

<variant>1-e, 2-a, 3-c, 4-b, 5-d

<variant>1-c, 2-d, 3-b, 4-e, 5-a

<question>Define the solution of the environmental problem.

<variant>Recycling

<variant>Deforestation

<variant>overpopulation

<variant>pollution

<variant>waste

<question>Read the text and answer the question.

We are the caretakers of the earth. We know that polluted air, water and land are harmful to plants, animals and people. In Russia there a lot of regions which are severely polluted. It is plants that pollute our atmosphere with tons of harmful substances. These are very dangerous wastes. They go into the air and are carried by winds for great distances. 60% of the air pollution is caused by different means of transport: cars, trucks, buses. Then we must remember that when we use aerosol sprays, we destroy the ozone layer which protects the Earth from the dangerous ultraviolet rays of the sun.

What is one of the main sources of air pollution in Russia, according to the text?

<variant> Factories and industrial plants

<variant> Natural disasters and catastrophe

<variant> Aerosol sprays used by households

<variant>Deforestation and cutting trees

<variant> Waste disposal methods

<question>Read the text and answer the question.

We are the caretakers of the earth. We know that polluted air, water and land are harmful to plants, animals and people. In Russia there a lot of regions which are severely polluted. It is plants that pollute our atmosphere with tons of harmful substances. These are very dangerous wastes. They go into the air and are carried by winds for great distances. 60% of the air pollution is caused by different means of transport: cars, trucks, buses. Then we must remember that when we use aerosol sprays, we destroy the ozone layer which protects the Earth from the dangerous ultraviolet rays of the sun.

How do harmful substances from plants affect the environment?

<variant>They are carried by winds over long distances.

<variant>They stay in one place and only impact the local area.

<variant>They are contained and do not spread beyond the plant.

<variant>They mostly affect the water supply.

<variant>They only affect animals, not humans.

<question>Read the text and answer the question.

We are the caretakers of the earth. We know that polluted air, water and land are harmful to plants, animals and people. In Russia there a lot of regions which are severely polluted. It is plants that pollute our atmosphere with tons of harmful substances. These are very dangerous wastes. They go into the air and are carried by winds for great distances. 60% of the air pollution is caused by different means of transport: cars, trucks, buses. Then we must remember that when we use aerosol sprays, we destroy the ozone layer which protects the Earth from the dangerous ultraviolet rays of the sun.

What is the impact of using aerosol sprays, as mentioned in the text?

<variant> They contribute to the destruction of the ozone layer

<variant> They cause water pollution.

<variant> They lead to an increase in transport-related pollution.

<variant> They increase soil contamination.

<variant> They prevent air pollution.

<question>Read the text and answer the question. According to the text caretakers are...?

We are the caretakers of the earth. We know that polluted air, water and land are harmful to plants, animals and people. In Russia there a lot of regions which are severely polluted. It is plants that pollute our atmosphere with tons of harmful substances. These are very dangerous wastes. They go into the air and are carried by winds for great distances. 60% of the air pollution is caused by different means of transport: cars, trucks, buses. Then we must remember that when we use aerosol sprays, we destroy the ozone layer which protects the Earth from the dangerous ultraviolet rays of the sun.

<variant>ordinary people

<variant>public servants

<variant>underground inhabitants

<variant>government officials

<variant>zoo workers

<question>Read the text and answer the question. According to the text what is the main source of air pollution?

We are the caretakers of the earth. We know that polluted air, water and land are harmful to plants, animals and people. In Russia there a lot of regions which are severely polluted. It is plants that pollute our atmosphere with tons of harmful substances. These are very dangerous wastes. They go into the air and are carried

by winds for great distances. 60% of the air pollution is caused by different means of transport: cars, trucks, buses. Then we must remember that when we use aerosol sprays, we destroy the ozone layer which protects the Earth from the dangerous ultraviolet rays of the sun.

<variant>means of transports

<variant>useful substances

<variant>aerosol sprays

<variant>ultraviolet rays

<variant>plants and animals

<question>Read the text and answer the question.

We are the caretakers of the earth. We know that polluted air, water and land are harmful to plants, animals and people. In Russia there a lot of regions which are severely polluted. It is plants that pollute our atmosphere with tons of harmful substances. These are very dangerous wastes. They go into the air and are carried by winds for great distances. 60% of the air pollution is caused by different means of transport: cars, trucks, buses. Then we must remember that when we use aerosol sprays, we destroy the ozone layer which protects the Earth from the dangerous ultraviolet rays of the sun.

According to the text, which factor plays the largest role in contributing to air pollution, and what are the consequences of this pollution?

<variant>Transport methods such as cars, trucks, and buses are responsible for 60% of air pollution, which can spread over large distances.

<variant>Industrial plants and factories are the sole cause of air pollution, leading to local environmental damage.

<variant>The use of aerosol sprays causes both air pollution and water pollution, harming the Earth's ecosystems.

<variant>Air pollution caused by transport and aerosol sprays mainly affects plants and has no impact on animals or people.

<variant>Ozone layer destruction caused by aerosol sprays leads to direct air pollution from ultraviolet radiation.

<question>Define the solution of the environmental problem.

<variant>public transport

<variant>cutting trees

<variant>climate change

<variant>fossil fuels

<variant>forest fires

<question>What doesn't refer to the solution of the environmental problem?

<variant>Usage of fertilizer

<variant>Public transport

<variant>Renewable energy

<variant>Recycling

<variant>stop hunting

<question>What doesn't refer to the activity of Green Peace?

<variant>support international organizations with money

<variant>create a nuclear-free world.

<variant>block the way to the ships that try to dump waste

<variant>stop killing baby sharks

<variant>stop hunting whales

<question>Complete the sentence: Greenhouse effect is sometimes called ...

<variant>global warming

<variant>patients care

<variant>establishment, society

<variant>friendly world

<variant>outstanding figures

<question>Complete the sentence: Green Peace was founded in 1969 by a group of ...

<variant>Canadian

<variant>Pakistan

<variant>Kazakhstan

<variant>USA

<variant>Brazil

<question>Which countries use the most renewable energy?

<variant>Iceland and Costa Rica

<variant>The USA and Great Britain

<variant>Japan and Korea

<variant>New Zealand and Australia

<variant>The UAE and Qatar

<question>Complete the sentence: The main cause of climate change is ...

<variant>greenhouse gases

<variant>cutting down of trees

<variant>washing away of soil

<variant>use of fertilizer and pesticides

<variant>unclean water

<question>Read the text and answer the question. What is the role of rainforests?

Rainforests help to control global warming because they absorb carbon dioxide.

In recent years, large areas have been destroyed, as trees are cut down for wood or burned to clear the land for farming. The burning releases large amounts of carbon dioxide into the atmosphere.

Many rainforests grow on poor soils, so when they are cut down or burned the soil is washed away in tropical rains, so that the area may turn into desert. Many

plant and animal species that live there can become extinct, and indigenous tribes can lose their homes.

<variant>absorb carbon dioxide

<variant>release carbon dioxide

<variant>control tropical rains

<variant>clear land for farming

<variant>turn area into desert

<question>Complete the sentence. Andy ____ the family car.

<variant>washes

<variant>wash

<variant>washes

<variant>washing

<variant>have washed

<question>Choose right variant.

Which sentence is in the Simple Present?

<variant>He reads a book.

- <variant>He is reading a book.
- <variant>He read a book.
- <variant>He has read a book.
- <variant>He will read a book.

<question>Choose right variant.

Which negative sentence in the Simple Present is correct?

- <variant>He does not read a book.
- <variant>He do not reads a book.
- <variant>He is not reading a book.
- <variant>He not read a book.
- <variant>He do not read a book.

<question>Choose right variant.

Which negative sentence in the Simple Present is correct?

- <variant>We don't work in a bank.
- <variant>We does not work in a bank.
- <variant>We do'nt work in a bank.
- <variant>We doesn't work in a bank
- <variant>We are doing work in a bank

<question>Choose right variant.

Which question is in the Simple Present used correctly?

- <variant>Does she work in an office?
- <variant>Do she works in an office?
- <variant>Do she work in an office?
- <variant>Work she in an office?
- <variant>Works she in an office?

<question>Choose right variant.

In which sentence is the Simple Present used correctly?

- <variant>Carol cleans the bathroom.
- <variant>Carol clean the bathroom.
- <variant>Carol cleannig the bathroom.
- <variant>Carol cleaned the bathroom.
- <variant>Carol didn't clean the bathroom.

<question>Choose right variant.

In which sentence is the Simple Present used correctly?

- <variant>Andrew washes the dishes.
- <variant>Andrew wash the dishes.
- <variant>Andrew washs the dishes.
- <variant>Andrew washing the dishes.
- <variant>Andrew washed the dishes.

<question>Define odd and end lines.

<variant>Healthy lifestyle, work out, sleep, work-life balance

<variant>Deforestation, solar energy, water pollution, ocean trash

<variant>air pollution, rainforests, garbage

<variant>global warming, habitat, smog, resource depletion

<variant>severely polluted, harmful substances, overcrowding

<question>Define odd and end lines.

<variant>Healthy diet, better mood, improves memory, strong bones and teeth

<variant>heart problems, garlic, pain, willow tree, cut and burns

<variant>stomach problems, a fever, purple foxgloves, bark of the tree

<variant>natural remedies, burns and cuts, sore throats, healing effect

<variant>sleeping problems, natural remedies, a fever, clean and thin blood

<question>Read the text and find synonym of the bold phrase.

Advertising and marketing is another controversial area. Some people feel that advertising for **junk food** and unhealthy snacks should not be directed at children and teenagers. One opinion is that young people should be protected by a ban on this kind of advertising before 9 p.m. on television and that there should be more controls over websites, sponsorship and in-store promotions.

<variant>Fast food

<variant>Healthy food

<variant>Delicious food

<variant>Fresh food

<variant>Prepared food

<question>Read the text and find antonym of the bold phrase.

Advertising and marketing is another controversial area. Some people feel that advertising for **junk food** and unhealthy snacks should not be directed at children and teenagers. One opinion is that young people should be protected by a ban on this kind of advertising before 9 p.m. on television and that there should be more controls over websites, sponsorship and in-store promotions.

<variant>Healthy food

<variant>Fast food

<variant>Tasty food

<variant>Snack food

<variant>Canned food

<question>Read the text and find definition of the bold word.

Advertising and marketing is another controversial area. Some people feel that advertising for junk food and unhealthy **snacks** should not be directed at children and teenagers. One opinion is that young people should be protected by a ban on this kind of advertising before 9 p.m. on television and that there should be more controls over websites, sponsorship and in-store promotions.

<variant>food eaten between regular meals

- <variant>just prepared food
- <variant>meat-free food
- <variant>some types of organic food
- <variant>food bought in restaurants

<question>Match the vocabulary with the correct definition and write a–e next to the numbers 1–5.

1. meat-free	a) to become vegetarian
2. your diet	b) without meat
3. to go veggie	c) the food that you normally eat
4. ethical	d) to give something up; to stop eating or doing something
5. to cut out something	e) related to what you think is right or wrong

<variant>1-b, 2-c, 3-a, 4-e, 5-d

<variant>1-b, 2-a, 3-e, 4-c, 5-d

<variant>1-a, 2-b, 3-e, 4-c, 5-d

<variant>1-d, 2-a, 3-e, 4-b, 5-a

<variant>1-e, 2-a, 3-d, 4-b, 5-c

<question> According to the text Vegetarianism is.....

Vegetarianism is increasing in the UK as more and more British people are deciding not to eat meat and animal products. According to the UK Vegetarian Society, 2,000 people are giving up meat and ‘going veggie’ in Britain every week. There’s even a National Vegetarian Week organised every year to encourage people to try a meat-free lifestyle.

<variant>growing

<variant>decreasing

<variant>banned

<variant>prohibited

<variant>reducing

<question>Read the text and find definition of the bold phrase

According to the Soil Association, the UK’s leading organization for organic food and farming, three out of every four households in the UK now buy some types of **organic food**. Some people buy organic meat, fruit and vegetables from farmers’ markets, where local farmers sell their products directly to the consumer.

<variant>Ecological and biological food

<variant>Most expensive food

<variant>Properly packaged food

<variant>Conventionally grown food

<variant>Highly-processed food

<question>Read the text and answer to the question

How many households buy organic food in UK?

According to the Soil Association, the UK's leading organization for organic food and farming, three out of every four households in the UK now buy some types of organic food. Some people buy organic meat, fruit and vegetables from farmers' markets, where local farmers sell their products directly to the consumer.

<variant>3/4

<variant>4/3

<variant>3,4

<variant>4,3

<variant>3-4

<question>Read the text and complete the sentence.

The chest X-ray is the commonest diagnostic X-ray examination. Normally a frontal (anteroposterior) view is obtained. The patient stands facing the photographic plate with the chest pressed to the plate, with hands on hips and elbows pushed out in front. The radiographer, the technician who takes the X-ray, asks the patient not to move, then to breathe in deeply and not to breathe out. This makes a blurred, unclear X-ray image less likely and improves the quality of the image, as it is easier to see abnormalities in air-filled (inflated) lungs than in deflated lungs.

According to the text radiographer is - ...

<variant>the technician who takes the X-ray

<variant>the inventor of the X-ray

<variant>the technician who works on the radio

<variant>the reporter on the radio

<variant>the X-ray equipment

<question>Complete the sentence. The first antibiotics penicillin was discovered by....

<variant>Alexander Fleming

<variant>Marie Curie

<variant>Alexander Graham Bell

<variant>Wilhelm Röntgen

<variant>Paul Charpentier

<question>Match words to make correct collocations.

1) Healthy	a. diet
2) Balanced	b. disease
3) Work	c. treatment
4) Effective	d. lifestyle
5) Chronic	e. out

<variant>1-d, 2-a, 3-e, 4-c, 5-b

<variant>1-b, 2-e, 3-a, 4-c, 5-d

<variant>1-c, 2-d, 3-a, 4-b, 5-e

<variant>1-d, 2-e, 3-c, 4-a, 5-b

<variant>1-a, 2-e, 3-d, 4-c, 5-b

<question>Read the text and answer to the question:

According to the text, what is the cause of disease from the outside world?

When you get sick, part or all of your body is not working as it should. The cause of sickness can come from inside your body or from the outside world. Diseases that start on the inside are usually inherited in the genes that you receive from your parents, which make up the master plan that determines how your body will grow and run. Abnormal development or functioning of different body systems is the cause of many chronic diseases. Things in the outside world can cause sickness too. Poisons in the environment can cause illnesses in people. Not eating the right foods, with their important nutrients, can also cause diseases. But the most common cause of sickness from the outside world is infectious agents.

<variant>Infectious agents

<variant>Abnormal functioning of body systems

<variant>Abnormal development of body systems

<variant>Genes that you receive from your parents

<variant>Not eating the right foods

<question>Read the text and answer to the question:

According to the text what are antibiotics produced by?

Penicillin heralded the dawn of the antibiotic age. Before its introduction there was no effective treatment for infections such as pneumonia, gonorrhea or rheumatic fever. Hospitals were full of people with blood poisoning contracted from a cut or a scratch, and doctors could do little for them but wait and hope. Antibiotics are compounds produced by bacteria and fungi which are capable of killing, or inhibiting, competing microbial species. This phenomenon has long been known; it may explain why the ancient Egyptians had the practice of applying a poultice of moldy bread to infected wounds. But it was not until 1928 that penicillin, the first true antibiotic, was discovered by Alexander Fleming, Professor of Bacteriology at St. Mary's Hospital in London.

<variant>bacteria and fungi

<variant>moldy bread

<variant>a cut or a scratch

<variant>microbial species

<variant>infected wounds

<question>Read the text and answer to the question:

According to the text, how are antibiotics produced, and what historical significance do they hold?

Penicillin heralded the dawn of the antibiotic age. Before its introduction there was no effective treatment for infections such as pneumonia, gonorrhea or rheumatic fever. Hospitals were full of people with blood poisoning contracted from a cut or a scratch, and doctors could do little for them but wait and hope. Antibiotics are compounds produced by bacteria and fungi which are capable of killing, or inhibiting, competing microbial species. This phenomenon has long

been known; it may explain why the ancient Egyptians had the practice of applying a poultice of moldy bread to infected wounds. But it was not until 1928 that penicillin, the first true antibiotic, was discovered by Alexander Fleming, Professor of Bacteriology at St. Mary's Hospital in London.

<variant>Antibiotics are naturally produced by bacteria and fungi to kill or inhibit other microbes, and their use has historical roots in ancient practices.

<variant>Antibiotics are synthesized by human scientists to treat bacterial infections, and they were first discovered in the 19th century.

<variant>Antibiotics are created in laboratories using synthetic chemicals and were immediately available for public use after their discovery.

<variant>Antibiotics are derived from mold found in soil, and the discovery of penicillin led to the prevention of viral infections like smallpox.

<variant>Antibiotics were first developed by ancient civilizations, but their widespread use began only after Fleming's experiments with penicillin.

<question>Read the text and answer to the question:

What was the significance of penicillin's discovery in the history of medicine?

Penicillin heralded the dawn of the antibiotic age. Before its introduction there was no effective treatment for infections such as pneumonia, gonorrhea or rheumatic fever. Hospitals were full of people with blood poisoning contracted from a cut or a scratch, and doctors could do little for them but wait and hope. Antibiotics are compounds produced by bacteria and fungi which are capable of killing, or inhibiting, competing microbial species. This phenomenon has long been known; it may explain why the ancient Egyptians had the practice of applying a poultice of moldy bread to infected wounds. But it was not until 1928 that penicillin, the first true antibiotic, was discovered by Alexander Fleming, Professor of Bacteriology at St. Mary's Hospital in London.

<variant> It marked the first effective treatment for bacterial infections.

<variant> It was the first synthetic compound used to treat viral infections like smallpox.

<variant> It led to the immediate eradication of infectious diseases such as gonorrhea and rheumatic fever.

<variant> It allowed doctors to prevent infections caused by cuts and scratches using herbal remedies.

<variant> It was used in hospitals as a general treatment for all forms of infections before 1928.

<question>Read the text and answer to the question:

Why do bacteria and fungi produce antibiotics, according to the text?

Penicillin heralded the dawn of the antibiotic age. Before its introduction there was no effective treatment for infections such as pneumonia, gonorrhea or rheumatic fever. Hospitals were full of people with blood poisoning contracted from a cut or a scratch, and doctors could do little for them but wait and hope.

Antibiotics are compounds produced by bacteria and fungi which are capable of killing, or inhibiting, competing microbial species. This phenomenon has long

been known; it may explain why the ancient Egyptians had the practice of applying a poultice of moldy bread to infected wounds. But it was not until 1928 that penicillin, the first true antibiotic, was discovered by Alexander Fleming, Professor of Bacteriology at St. Mary's Hospital in London.

<variant> To eliminate competing microbial species in their environment.

<variant> To prevent viral infections from spreading in their environments.

<variant> To enhance their growth and survival in nutrient-poor environments.

<variant> To help humans by naturally treating infections in open wounds.

<variant> To increase their resistance to harmful environmental conditions.

<question>Choose the correct variant:

..... the watch was expensive, he bought it.

<question>Put the correct words to complete the text.

Many vegetarians choose not to eat or animal products for ethical reasons. They are unhappy about the bad treatment of the and the effects of meat and fishon the environment. Worries about food safety cause many people to stop eating meat. Others choose to change their to improve their general

- <variant>meat / animals / production / diet / health
- <variant>production / animals / meat / health / diet
- <variant>meat / diet / health / animals / production
- <variant>animals / meat / diet / production / health
- <variant>health / diet / production / animals / meat

<question>Put the correct words to complete the text.

According to the Vegetarian Society, a diet could help reduce the risk of certain cancers and the possibility of heart, as well as other health such as obesity and high blood

- <variant>meat-free / disease / problems / pressure
- <variant>pressure / problems / disease / meat-free
- <variant>problems / pressure / meat-free / disease
- <variant>disease / meat-free / pressure / problems
- <variant>meat-free / pressure / problems / disease

<question>Read the text. Are these sentences true (T) or false (F)?

Many vegetarians and vegans choose not to eat meat or animal products for ethical reasons. According to the Vegetarian Society, a meat-free diet could help reduce the risk of certain cancers and the possibility of heart disease, as well as other health problems such as obesity and high blood pressure. Others choose to change their diet to improve their general health. They are unhappy about the bad treatment of the animals and the effects of meat and fish production on the environment. Worries about food safety cause many people to stop eating meat.

1.	Vegetarians don't eat meat and animal products.
2.	A meat-free diet increase the risk of certain cancers and the possibility of heart disease.
3.	Vegetarians don't like the bad treatment of the animals.

- <variant>T; F; T
- <variant>T; F; F

<variant>T; T; F
<variant>F; F; T
<variant>F; T; F

<question>Read the test. Are these sentences true (T) or false (F)?

Many vegetarians and vegans choose not to eat meat or animal products for ethical reasons. According to the Vegetarian Society, a meat-free diet could help reduce the risk of certain cancers and the possibility of heart disease, as well as other health problems such as obesity and high blood pressure. Others choose to change their diet to improve their general health. They are unhappy about the bad treatment of the animals and the effects of meat and fish production on the environment. Worries about food safety cause many people to stop eating meat.

1)	A meat-free diet cause such problems as obesity and high blood pressure.
2)	Some people change their diet to be slim.
3)	Many people stop eating meat because they worry about safety of food

<variant>occasion, accurate

<question>Read the text and answer the question. What are drugs?

More people are abusing drugs today than in any other time in history of mankind, and many of those people are youth Understanding what drugs are is fundamental for understanding their potential abuse. Drugs are a psychoactive substance. A psychoactive substance is something that people take to change the way they feel, think or behave. Some of these substances are called drugs and others, like alcohol and tobacco, are considered dangerous, but are not called drugs. The term drug also covers a number of substances that must be used under medical supervision to treat illnesses.

<variant>psychoactive substance

<variant>dangerous things

<variant>alcohol and tobacco

<variant>history of mankind

<variant>called drugs

<question>Read the text and answer the question. Why do people use drugs?

These are called man-made or synthetic drugs and include ecstasy, LSD, etc. These were initially manufactured for largely experimental reasons and only later were used for recreational purposes. Now, however, with the increased size and

scope of the drug trade, people set out to invent drugs especially for human consumption.

For the first time in human history, a whole industrial complex creates and produces drugs that are meant to be used for the sole purpose of «having fun.» People use drugs just to escape the reality, to have fun. The majority of them are young, even very young, who do not understand what might happen to them because of drugs.

<variant>To escape the reality, to have fun.

<variant>To take care, to have drugs.

<variant>For recreational purposes.

<variant>For experimental reasons.

<variant>To increase size and scope of the drug trade.

<question>Read the text and answer the question.

What is the nationality of Beethoven?

Ludwig van Beethoven german composer and pianist. Beethoven remains one of the most admired composers in the history of Western music; his works rank amongst the most performed of the classical music repertoire and span the transition from the Classical period to the Romantic era in classical music. His career has conventionally been divided into early, middle, and late periods.

<variant>German

<variant>English

<variant>Russian

<variant>Italian

<variant>Canadian

<question>Read the text and find right answer.

Ludwig van Beethoven`s early period, during which he forged his craft, is typically considered to have lasted until 1802. From 1802 to around 1812, his middle period showed an individual development from the styles of Joseph Haydn and Wolfgang Amadeus Mozart, and is sometimes characterized as heroic. During this time, he began to suffer increasingly from deafness. In his late period, from 1812 to 1827, he extended his innovations in musical form and expression. He extended his innovations in musical form and expression

<variant>1812 to 1827

<variant>1802 to 1812

<variant>1822 to 1827

<variant>1832 to 1847

<variant>1805 to 1807

<question>Read the text and answer the question.

What is the origin of the word “opera”?

Italian word "opera" is typically a collaboration between a composer and a librettist and incorporates a number of the performing arts, such as acting, scenery, costume, and sometimes dance or ballet. Opera originated in Italy at the end of the 16th century (with Jacopo Peri's mostly lost *Dafne*, produced in Florence in 1598) especially from works by Claudio Monteverdi, notably *L'Orfeo*, and soon spread through the rest of Europe: Heinrich Schütz in Germany, Jean-Baptiste Lully in France, and Henry Purcell in England all helped

to establish their national traditions in the 17th century. In the 18th century, Italian opera continued to dominate most of Europe (except France), attracting foreign composers such as George Frideric Handel.

<question>Read the text and answer the question.

According to the text what should be the objective of an advertisement?

Although the average citizen is usually annoyed by all the advertisements, the impact of it on people is immense and plays a very important role in our lives. The first function of advertisement is to inform. A lot of the information people have about household devices, cars, electronic equipment, cosmetics and food is largely derived from the advertisements they read.

<variant>to inform consumers

<variant>to manipulate consumers

<variant>to entertain consumers

<variant>none of the above

<variant>to annoy citizen

<question>Read the text and complete the sentence.

According to the text the best advertising messages...

Forget general messages; advertise current offers instead. Find out about local events and use them in your promotion. Messages like 'Wouldn't you love a cool new hairstyle for your school graduation next month?' will show that you know your customers and are familiar with their needs.

<variant>refer to current promotions.

<variant>include lots of useful information about your business.

<variant>offer massive price reductions.

<variant>are aimed at students.

<variant>offer new hairstyle

<question>Read the text and complete the sentence.

According to the author, you should...

A website is a cost-effective way of communicating a lot of information: the location of your business, your opening times, your prices, your staff, and so on. That way, you can print simpler brochures. People rarely bother to read advertising

literature with too much information. Simply print your main message and add your website address. Potential customers who want to know more about you will know where to look.

<variant>always include your website address on your leaflets.

<variant>tell potential customers to find out about your business themselves.

<variant>include all the important facts about your business on your leaflets.

<variant>do all your advertising on the Internet.

<variant>don't indicate your location

<question>Read the text and complete the sentence.

According to the text the author says you can make sure that your customers help you to advertise your business by.....

Make use of your customers. Make sure they are happy with your services, and ask them to recommend you to their friends. Ask them for their email addresses so that you can keep them informed about special offers. If they agree, there is a good chance that they will forward your emails to their friends.

<variant>asking them for their friends' email addresses so that you can reach more people.

<variant>getting their feedback so they can change things they are not happy with.

<variant>asking them to advertise your business for a small fee.

<variant>providing them with a good service.

<variant>writing recommendation letter

<variant>Nivea

<question>Choose right variant.

Brand names after an African gazelle.

<variant>Reebok

<variant>Nike

<variant>Toyota

<variant>Rolls Royce

<variant>Nivea

<question>Read and answer the question.

According to the text why brand names are important?

The name is the most important element of a successful brand. Packaging changes, advertising changes, products even change but brand names never change. Where do great brand names come from? All different sources, they may come from family names or perhaps the inventor's favorite color or animal or sometimes the names are just completely made up. For example, McDonald's is a family name, Adidas was created from the inventor's name Adi Dassler, Volvo means "to roll" in Latin.

<variant>Because brand names remain unchanged

<variant>Because brand names are family names

<variant>Because brand names inventor's favorite color or animal

<variant>Because brand names frequently change

<variant>Because brand names were created from the inventors' name

<question>Read the text and complete the sentence.

<question>According to the text are these sentences true (T) or false (F)?

Although the average citizen is usually annoyed by all the advertisements, the impact of it on people is immense and plays a very important role in our lives. The first function of advertisement is to inform. A lot of the information people have about household devices, cars, electronic equipment, cosmetics and food is largely derived from the advertisements they read.

1	The average citizen enjoyed by advertisements
2	Advertisements inform us about the existence of certain product
3	Advertisements have an enormous impact on people

<variant>FTT

<variant>TFT

<variant>FTF

<variant>TFF

<variant>TTT

<question>According to the tips are the sentences true (T) or false (F)?

Tips to creating an effective advertisement:

-Keep the advert short, with clear paragraphs or bullet points.
-Include description of the material, style, size/measurements and condition.
-Say if the item must be collected or if you can deliver it.
-You can leave out certain words to make sentences shorter, e.g. Selling due to moving house instead of I am selling

1.	Short adverts with the key details work best.
2.	Don't give information about the condition of the item.

3.	Use clear paragraphs.

<variant>judges

<question>Match the definition with its term.

A global network of billions of computers and other electronic devices

<variant>internet

<variant>ethernet

<variant>telegraph

<variant>post

<variant>typewriter

<question>Match the definition with its term.

A communication system that send information by making and breaking an electronical connection

<variant>telegraph

<variant>video call

<variant>bluetooth headset

<variant>stereo

<variant>memory card

<question>Match the definition with its term.

Mechanical or electromechanical machine for typing characters

<variant>typewriter

<variant>tablet

<variant>scanner

<variant>gameboy

<variant>pen drive

<question>Find definition for the word: **Dictaphone**

<variant> specialized piece of recording technology

<variant> kitchen device that uses a gear-driven mechanism to rotate a set of "beaters" in a bowl

<variant> machine—especially one programmable by a computer— capable of carrying out a complex series of actions automatically

<variant>records some images

<variant>controls the cursor

<question>Find definition for the word: ***Fax machine***

<variant> telephonic transmission of scanned printed material (both text and images), normally to a telephone number connected to a printer or other output device

<variant> device that captures images from photographic prints, posters, magazine pages, and similar sources for computer editing and display

<variant> peripheral machine which makes a persistent representation of graphics or text, usually on paper

<variant> portable USB flash memory device

<variant>short-range wireless technology standard

<question> Find definition for the word: ***Mouse***

<variant>is a hand-held pointing device that detects two-dimensional motion relative to a surface

<variant>position indicator on a computer display screen where a user can enter text

<variant>a typewriter-style device which uses an arrangement of buttons or keys to act as mechanical levers or electronic switches.

<variant>graphical control element that provides the user a simple way to trigger an event

<variant>family of wired computer networking technologies commonly used in local area networks

<question>Match words to make correct collocations.

access to the	a) online
online	b) internet
shop	c) an item
click on	d) privacy
social media	e) networks

<variant>1-b, 2-d, 3-a, 4-c, 5-e

<variant>1-c, 2-a, 3-e, 4-b, 5-d

<variant>1-d, 2-e, 3-a, 4-b, 5-c

<variant>1-e, 2-c, 3-b, 4-a, 5-d

<question> Match pictures with their names.

<variant>magnifying glass, beakers, thermometer

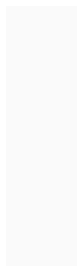

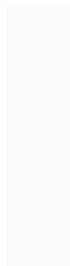

<variant>test tube, microscope, breaker

<variant>brush, test, knob

<variant>stage clip, light source, thermometer

<variant>flask, burner, dropper

<question> Match pictures with their names.

<variant>dropper, volumetric flask, burner
<variant>droplets, tongs, brushes
<variant>weighing machine, wash bottles, burner
<variant>spatula, spring balance, burette
<variant>watch glass, breaker, tongs

<question>Match pictures with their names.

<variant>spatula, ammeter, funnels
<variant>watch glass, breaker, tongs
<variant>burette, spring balance, funnels
<variant>spoon, ammeter, wash bottles
<variant>glass, breaker, spatula

<question>Match the collocation with its synonym: *Access to the Internet*

<variant>Able to connect to the Internet
<variant>Online platforms for communication between people and organisations
<variant>To put computer programs back onto the computer
<variant>Shop via the Internet
<variant>Turn the computer off

<question>Match the collocation with its synonym: *Online piracy*

<variant>The downloading of licensed media without payment
<variant>To stop working suddenly
<variant>To sign onto the computer
<variant>To get a larger, quicker or more modern computer
<variant>A location where the Internet is available

<question>Match the collocation with its meaning: *Computer literate*

<variant>Adequate knowledge of a computer
<variant>Quickly become out of date
<variant>Able to connect to the Internet
<variant>Advances in technology
<variant>Progressive forward movement in technology

<question>Match the collocation with its meaning: *Surfing the web*

<variant>To move from one site to another on the Internet
<variant>Able to connect to the Internet
<variant>Advances in technology
<variant>To get a larger, quicker or more modern computer

<variant>A location where the Internet is available

<question>Match the collocation with its meaning: Control remotely

<variant>To control technology from a distance

<variant>Online platforms for communication between people and organisations

<variant>To put computer programs back onto the computer

<variant>Shop via the Internet

<variant>Turn the computer off

<question>Match the collocation with its meaning: Advances in technology

<variant>Progressive forward movement in technology

<variant>Quickly become out of date

<variant>To move from one site to another on the Internet

<variant>A location where the Internet is available

<variant>Turn the computer off

<question>Put the sentences in correct order.

a) but big enough to see plainly when you glance upwards
b) it uses your smartphone's GPS sensor and displays directions with a 3D map
c) The screen is tiny,
d) you can use Glass as a mapping guide
e) so, for instance,

<variant>c, a, e, d, b

<variant>c, b, e, d, a

<variant>a, c, e, d, b

<variant>c, a, d, b, e

<variant>c, e, a, b, d

<question>Put the sentences in correct order.

a) and videos to friends by email
b) "OK Glass, take a photo" or "OK Glass, record a video"
c) More usefully, the astonishing live translation app Word Lens is available on Google Glass
d) You can speak to the device with commands like
e) You can also send photos

<variant>d, b, e, a, c

<variant>a, c, e, d, b

<variant>b, a, e, d, c

<variant>e, d, a, b, c

<variant>c, a, d, e, b

<question>Put the sentences in correct order.

a) It's not just useful for travellers
--

b) and Virgin Atlantic ran a pilot scheme
c) , give them weather updates, translate foreign-language text and so on.
d) Copenhagen airport staff are using them
e) this spring where Upper Class passengers were greeted by staff using Glass to check them in

<variant>a, d, b, e, c

<variant>d, a, c, e, b

<variant>e, d, a, b, c

<variant>c, a, d, e, b

<variant>d, b, a, c, e

<question> Read the paragraph and answer the question?

What did Marie`s parents teach their children?

Marie Sklodowska Curie was born in 1867 in Poland. Her family was big, and she was the youngest of five children. Her parents were both teachers. They loved books and learning. They taught their children many important things about life, education and about respecting other people. Thanks to their support, Marie became one of the best students.

<variant>they taught many important things about life

<variant>they taught children in need

<variant>her parents were both teachers

<variant>she taught reading in her adulthood

<variant>she taught mathematics

<question>Read the paragraph and choose true sentence.

In her teenage life, Marie taught poor children how to read. She was very good at it. Later, she went to university and became an amazing scientist. She wanted to make a difference, so she worked very hard to help women to go to university. At that time, it was not typical for girls to continue their studies after finishing school, so her parents founded a secret university just for them.

<variant>she taught children in need how to read

<variant>she taught reading in her adulthood

<variant>she wanted to make a difference

<variant>she didn't finish school

<variant>she wasn't good at teaching

<question>Read the paragraph and choose the correct sentence.

In her teenage life, Marie taught poor children how to read. She was very good at it. Later, she went to university and became an amazing scientist. She wanted to make a difference, so she worked very hard to help women to go to university. At that time, it was not typical for girls to continue their studies after finishing school, so her parents founded a secret university just for them.

<variant>girl's didn't enter universities after school

<variant>everyone went to university after school

<variant>it was easy to enter university for girls
<variant>girls didn't want to go to university
<variant>girls and boys went to university together

<question>Read the paragraph and answer the question?

What was the reason of her death?

Marie Curie was the first ever woman to win the Nobel Prize. First, she got it for her work in Physics, and what was even more surprising, she received a second prize but this time in Chemistry.

Working with X-Ray machines made Marie Curie very ill. At that time, people did not know that it was dangerous to use radioactive elements without special protection. As a result, she died in 1934, at the age of 66.

<variant>working with radioactive elements

<variant>working with Pierre

<variant>she won Nobel prize

<variant>she had a diabetes

<variant>she had a stroke

<variant>100

<question>Read the text and answer the question.

Scientists at Harokopio University in Athens found that the benefits of Mediterranean diet outweigh those of regular exercise — and it does not matter whether you are a man or a woman, old or young. More than two thousand and five hundred Greek adults, aged eighteen to eighty nine, provided researchers with details about their health each year from two thousand and one to two thousand and twelve. The participants also completed comprehensive surveys about their

medical records lifestyle and dietary habits three times throughout the study: at the start, after five years and after ten years.

What is the main finding of the study conducted by Harokopio University?

<variant> The Mediterranean diet has greater health benefits than regular exercise, regardless of gender, age.

<variant> Regular exercise is more beneficial than a Mediterranean diet, regardless of age or gender.

<variant> The study found no significant difference between the Mediterranean diet and other dietary habits.

<variant> The Mediterranean diet is only effective when combined with regular exercise.

<variant> The benefits of the Mediterranean diet are limited to older adults.

<question>Read the text and answer the question:

Scientists at Harokopio University in Athens found that the benefits of Mediterranean diet outweigh those of regular exercise — and it does not matter whether you are a man or a woman, old or young. During the decade, almost a fifth (twenty per cent) of the men and twelve per cent of the women who took part in the study developed or died from heart disease. Overall, those who most closely adhered to a Mediterranean-style diet were found to be forty-seven per cent less likely to develop heart disease than those who did not.

During the decade, almost ____ percent of the men and 12 per cent of the women who took part in the study developed or died from heart disease.

How was the data for the study on the Mediterranean diet collected?

<variant> Participants provided yearly health updates and completed surveys about their lifestyle.

<variant> Participants were observed in laboratories and given strict diet plans to follow.

<variant> Researchers conducted annual medical tests on all participants for over a decade.

<variant> The study used only participants' medical records and did not include information on their lifestyle.

<variant> The data was collected through interviews every five years with selected participants.

<question>Read the text and answer the question:

Mediterranean diet better than exercise at preventing heart disease, regardless of your age or gender, study finds. Scientists at Harokopio University in Athens are the first to track heart disease in a general population. You have heard the evidence before but one can never be too sure — yet another study has shown that adopting a Mediterranean diet is good for your health. Filling up on oily fish, nuts, whole grains and fruit and vegetables — and even the odd glass of red wine — could cut your risk of developing heart disease by almost half over a 10-year period.

What range of ages was included in the Harokopio University study?

<variant> Greek adults aged 18 to 89, representing a wide age range.

- <variant> Only adults between the ages of 18 and 50.
- <variant> Participants aged 20 to 70, representing a middle-aged population.
- <variant> All age groups from children to elderly individuals.
- <variant> Adults older than 60 were the primary focus of the study.

<question>According to the text are the sentences true (T) or false (F)?

Mediterranean diet better than exercise at preventing heart disease, regardless of your age or gender, study finds. Scientists at Harokopio University in Athens are the first to track heart disease in a general population. You have heard the evidence before but one can never be too sure — yet another study has shown that adopting a Mediterranean diet is good for your health. Filling up on oily fish, nuts, whole grains and fruit and vegetables — and even the odd glass of red wine — could cut your risk of developing heart disease by almost half over a 10-year period.

Scientists found that the benefits even outweigh those of regular exercise — and it does not matter whether you are a man or a woman, old or young.

Ekavi Georgousopoulos, a PhD candidate, who conducted the study along with Professor Demosthenes B Panagiotakos, said: "Our study shows that the Mediterranean diet is beneficial for all types of people — in both genders, in all age groups, and in both healthy people and those with health conditions.

- | |
|--|
| 1. The Mediterranean diet includes oily fish, nuts, whole grains, fruit, vegetables, and red wine. |
| 2. Exercise is more beneficial than diet. |
| 3. The study focused on people of all age groups, not just middle-aged people. |

<variant>TFF

<variant>FTT

<variant>TTT

<question>According to the text are the sentences true (T) or false (F)?

During the decade, almost a fifth (20 per cent) of the men and 12 per cent of the women who took part in the study developed or died from heart disease. Overall, those who most closely adhered to a Mediterranean-style diet were found to be 47 per cent less likely to develop heart disease than those who did not. This figure was the same regardless of other risk factors such as age, gender, family history and smoking habits, all of which the researchers accounted for.

"Because the Mediterranean diet is based on food groups that are quite common or easy to find, people around the world could easily adopt this dietary pattern and help protect themselves against heart disease with very little cost,"

Georgousopoulou said. According to the study, women are more likely to adopt a Mediterranean diet than men are. Georgousopoulou also pointed out that although Greece is in the Mediterranean, many Greeks have adopted a more Western diet — also known as the meat-sweet diet — over the past 40 years. This diet includes large amounts of red meat, sugary desserts, high-fat foods, and refined grains.

- | |
|---|
| 1. The researchers did not take into account other risk factors such as smoking habits. |
| 2. Anybody can adopt the Mediterranean diet. |
| 3. Men are more likely to adopt a Mediterranean diet than women are. |

<question>According to the text complete the sentence choosing correct word:

Radiography and radiology

Radiography involves exposing a part of the body to a small dose of radiation to produce an image of the internal organs. Organs with high density such as the ribs and spine are radiopaque, meaning they do not absorb radiation, and appear white or light grey on the image. Lung tissue is radiolucent – absorbs radiation – and appears dark on the image. Before some types of X-rays, patients are given a liquid called a contrast medium, such as barium or iodine, which is radiopaque and allows the organ or tissue it fills to be examined. The contrast medium may be swallowed, introduced through the anus as an enema, or given as an injection. Radiology is the use of radiation in the diagnosis and treatment of diseases such as cancer.

In radiology, barium is used as a contrast

<variant>medium

<variant>image

<variant>X-rays

<variant>radiolucent

<variant>barium

<question>According to the text complete the sentence choosing correct word:

Radiography and radiology

Radiography involves exposing a part of the body to a small dose of radiation to produce an image of the internal organs. Organs with high density such as the ribs and spine are radiopaque, meaning they do not absorb radiation, and appear white or light grey on the image. Lung tissue is radiolucent – absorbs radiation – and appears dark on the image. Before some types of X-rays, patients are given a liquid called a contrast medium, such as barium or iodine, which is radiopaque and allows the organ or tissue it fills to be examined. The contrast medium may be swallowed, introduced through the anus as an enema, or given as an injection. Radiology is the use of radiation in the diagnosis and treatment of diseases such as cancer.

Tissue which absorbs radiation and appears dark on an X-ray is

<variant>radiolucent

<variant>X-rays

<variant>medium
<variant>image
<variant>barium

<question>Read the text and complete the sentence choosing correct word:

Radiography and radiology

Radiography involves exposing a part of the body to a small dose of radiation to produce an image of the internal organs. Organs with high density such as the ribs and spine are radiopaque, meaning they do not absorb radiation, and appear white or light grey on the image. Lung tissue is radiolucent – absorbs radiation – and appears dark on the image. Before some types of X-rays, patients are given a liquid called a contrast medium, such as barium or iodine, which is radiopaque and allows the organ or tissue it fills to be examined. The contrast medium may be swallowed, introduced through the anus as an enema, or given as an injection. Radiology is the use of radiation in the diagnosis and treatment of diseases such as cancer.

An ... is a liquid introduced into the bowel by way of the anus.

<variant>enema
<variant>image
<variant>X-rays
<variant>radiolucent
<variant>barium

<question>Read the text and complete the sentence choosing correct word:

X-ray examination

The chest X-ray is the commonest diagnostic X-ray examination. Normally a frontal (anteroposterior) view is obtained. The patient stands facing the photographic plate with the chest pressed to the plate, with hands on hips and elbows pushed out in front. The radiographer, the technician who takes the X-ray, asks the patient not to move, then to breathe in deeply and not to breathe out. This makes a blurred, unclear X-ray image less likely and improves the quality of the image, as it is easier to see abnormalities in air-filled (inflated) lungs than in deflated lungs.

X-rays used to measure the progress of a disease are called ... X-rays.

<variant>serial
<variant>repeated
<variant>abnormal
<variant>blurred
<variant>deflated

<question>Read the text and complete the sentence choosing correct word from:

X-ray examination

The chest X-ray is the commonest diagnostic X-ray examination. Normally a frontal (anteroposterior) view is obtained. The patient stands facing the photographic plate with the chest pressed to the plate, with hands on hips and

elbows pushed out in front. The radiographer, the technician who takes the X-ray, asks the patient not to move, then to breathe in deeply and not to breathe out. This makes a blurred, unclear X-ray image less likely and improves the quality of the image, as it is easier to see abnormalities in air-filled (inflated) lungs than in deflated lungs.

If a patient moves during an X-ray, the image may be

<variant>blurred

<variant>repeated

<variant>abnormal

<variant>serial

<variant>deflated

<question>Complete the sentence choosing correct word from the text:

X-ray examination

The chest X-ray is the commonest diagnostic X-ray examination. Normally a frontal (anteroposterior) view is obtained. The patient stands facing the photographic plate with the chest pressed to the plate, with hands on hips and elbows pushed out in front. The radiographer, the technician who takes the X-ray, asks the patient not to move, then to breathe in deeply and not to breathe out. This makes a blurred, unclear X-ray image less likely and improves the quality of the image, as it is easier to see abnormalities in air-filled (inflated) lungs than in deflated lungs.

It's easier to see abnormalities when the lungs are

<variant>inflated

<variant>repeated

<variant>serial

<variant>blurred

<variant>abnormal

<question>According to the text match two parts of the sentence:

Magnetic Resonance Imaging (MRI)

MRI is safer than X-rays because it does not use radiation. It provides more information than Computed Tomography about some head, neck and spinal disorders because the images are more detailed and have more contrast, meaning the differences between dark and light areas are stronger. Unlike CT, the images can be taken on any plane – any surface of the body seen from an angle. It is now used for imaging – taking images of – the brain and heart, and in oncology. Contraindications, cases in which it should not be used, include patients with metallic foreign bodies in the orbits, and patients with pacemakers – electronic devices surgically implanted to regulate heartbeat. MRI is also not approved during the first trimester of pregnancy.

1.MRI provides more detailed information than CT because	a) there is no radiation
2.MRI is not approved for use in	b) unlike CT
3.MRI is safer than X-rays because	c) of high contrast sensitivity

4.MRI allows imaging on many planes	d)the first three months of pregnancy

“I’m coming!”

<variant>She said that she was coming.

<variant>She says that she is coming.

<variant>She said that she were coming.

<variant>She said that she has been coming.

<variant>She said that she came.

<question>Change direct speech into reported speech:

“I was waiting for the bus when he arrived”

<variant>She told me that she was waiting for the bus when he arrived.

<variant>She told me that she waiting for the bus when he arrived.

<variant>She told me that she waited for the bus when he arrived.

<variant>She told me that she is waiting for the bus when he arrived.

<variant>She told me that she had waited for the bus when he arrived.

<question>Change direct speech into reported speech:

“Did he arrive on time?”

<variant>She asked me if he had arrived on time.

<variant>She asked me if he was arriving on time.

<variant>She asked me if he arrive on time.

<variant>She asked me if he has arrived on time.

<variant>She asked me if he is arriving on time.

<question>Change direct speech into reported speech:

“Can you help me?”

<variant>She asked me if I could help her.

<variant>She asked me if to help her.

<variant>She asked me if I can help her.

<variant>She asked me if I can help him.

<variant>She asked me if I help her.

<question>Change direct speech into reported speech:

“Where is he?”

<variant>She asked me where he was.

<variant>She asked me where was he.

<variant>She asked me where he had been.

<variant>She asked me where he is.

<variant>She asked me where he were.

<question>Change direct speech into reported speech:

“What are you doing?”

<variant>She asked me what I was doing.

<variant>She asked me what I doing.

<variant>She asked me what I to do.

<variant>She asked me what I had done.
<variant>She asked me what I were doing.

<question>Change direct speech into reported speech:
“Who was that beautiful woman?”

<variant>She asked me who that beautiful woman was.
<variant>She asked who that beautiful woman.
<variant>She asked me who that beautiful woman is.
<variant>She asked me that beautiful woman had been.
<variant>She asked me who that woman.

<question>Change direct speech into reported speech:
“Please help me carry this”

<variant>She asked me to help her carry that.
<variant>She asked me to help her carry this.
<variant>She asked me to help her to carry.
<variant>She asked me to helped her carry that.
<variant>She asked me to help her carry that was.

<question>Change direct speech into reported speech:
“Can you help me with my homework, please?”

<variant>She asked me to help her with her homework.
<variant>She asked me helped her with her homework.
<variant>She asked me helping her with her homework.
<variant>She asked me to help him with their homework.
<variant>She asked me to help her homework.

<question>Change direct speech into reported speech:
“Would you bring me a cup of coffee, please?”

<variant>She asked me to bring her a cup of coffee.
<variant>She ask me to bring her a cup of coffee.
<variant>She asked me bring her a cup of coffee.
<variant>She asked to bring him a cup of coffee.
<variant>She asked I to bring her a cup of coffee.

<question>Change direct speech into reported speech:
“Do your homework!”

<variant>She told me to do my homework.
<variant>She told me do my homework.
<variant>She told me did my homework.
<variant>She told me to doing my homework.
<variant>She told me had done my homework.

<question>Change direct speech into reported speech:
“Eat your dinner!”

<variant>She told me to eat my dinner.
<variant>She told me eaten my dinner.
<variant>She told me to eating my dinner.
<variant>She told me to eat I dinner.
<variant>She told me had eaten my dinner.

<question>Change direct speech into reported speech:

“Don’t make a mess!”

<variant>She told me not to make a mess.
<variant>She told me to make a mess.
<variant>She told me not making a mess.
<variant>She told me not made a mess.
<variant>She told them not make a mess.

<question>Define odd and end lines.

<variant>first aid, immediate care, keep calm
<variant>office address, date of birth
<variant>phone number, home address
<variant>private e-mail, marital status
<variant>in case of emergency warn, surname

<question>Find definition for the word **Weelchair**

<variant>a chair with wheels in which someone can sit and move around
<variant>a thin glass tube used for taking and measuring samples of liquid
<variant>a tube used to remove liquid from the body
<variant>an instrument or tight bandage wrapped round a limb to constrict an artery, so reducing the flow of blood and stopping bleeding from a wound
<variant>a medical instrument made of a tube with a plunger which either slides down inside the tube, forcing the contents out through a needle as in an injection, or slides up the tube, allowing a liquid to be sucked into it

<question>Find definition for the word **Tourniquet**

<variant>an instrument or tight bandage wrapped round a limb to constrict an artery, so reducing the flow of blood and stopping bleeding from a wound
<variant>a piece of cloth which is wrapped around a wound or an injured limb
<variant>a folding bed, with handles, on which an injured person can be carried by two people
<variant>an instrument for measuring temperature
<variant>two earpieces connected to a tube and a metal disc, used to listen to sounds made inside the body

<question>Find definition for the word **Drain**

<variant>a tube used to remove liquid from the body
<variant>an instrument for measuring temperature

<variant>a medical instrument made of a tube with a plunger which either slides down inside the tube, forcing the contents out through a needle as in an injection, or slides up the tube, allowing a liquid to be sucked into it

<variant>an instrument placed between the teeth to stop the mouth from closing

<variant>a triangular bandage attached around the neck, used to support an injured arm and prevent it from moving

<question>Choose the correct option: a small sharp-pointed knife used in surgery

<variant>scalpel

<variant>gag

<variant>hook

<variant>catheter

<variant>probe

<question>Choose the correct option: an instrument used to explore inside a cavity or wound.

<variant>probe

<variant>first aid kit

<variant>splint

<variant>cotton

<variant>pipette

<question>Read the paragraph and choose correct statement.

People should be trained to care properly for injuries to themselves and other at home, at work, or in the community. Even a small injury can be very serious and cause death, so everyone should know first aid techniques.

<variant>Everybody should know first aid techniques.

<variant>Small injuries cannot cause any problems

<variant>Everybody shouldn't know first aid techniques.

<variant>People don't need any training to care injuries

<variant>Accidents might happen only at home

<question>Read the paragraph and choose correct statement.

When first aiders face an emergency, they must be able to keep calm and organize other people to do like them. He or she must know how to supply artificial respiration, control bleeding and protect injuries. Medical assistance has to be arranged. Knowing how to carry the victim without causing more injuries is very important.

In short, effective first aid depends on prevention, recognition and organization. In our country hundreds of people die in traffic accidents every year because most people don't have first aid information. If more people were trained in first aid, the number of dead people would decrease. You may face an emergency anywhere. One day somebody from your family may be injured or suddenly become ill. In order not to be helpless in such a situation, you have to know first aid techniques.

<variant>During emergency situation it is better not to panic

<variant>There is no need of supplying artificial respiration

<variant>Knowing how to carry the victim without causing more injuries is less important.

<variant>No one from your family might be injured

<variant>You may face an emergency nowhere.

<question>Choose the correct option:

A medical instrument made of a tube with a plunger which either slides down inside the tube, forcing the contents out through a needle as in an injection, or slides up the tube, allowing a liquid to be sucked into it

<variant>syringe

<variant>gauze pads

<variant>cold pack

<variant>alcohol

<variant>cotton balls

<question>Choose the correct option: an instrument placed between the teeth to stop the mouth from closing.

<variant>gag

<variant>painkillers

<variant>band aids

<variant>Q-tips

<variant>alcohol wipes

<question>An instrument for measuring temperature.

<variant>thermometer

<variant>gloves

<variant>ointment

<variant>were / would visit
<variant>was / will visit
<variant>will be / will visit
<variant>is / would visit
<variant>are / will visit

<question>What would you do if a millionaire ____ you a lot of money.

<variant>gave
<variant>give
<variant>will give

<variant>giving
<variant>gives

<question> If I ____ the car myself I ____ you use it.

<variant>didn't need / would let
<variant>needed / would let
<variant>don't need / would let
<variant>didn't need / wouldn't let
<variant>doesn't need / would let

<question> If I ____ you I ____ never ____ her.

<variant>were / would forgive
<variant>am / shall forgive
<variant>was / don't forgive
<variant>had been / forgave
<variant>shall be / would have forgiven

<question> Many people would be out of work if those factories ____ down.

<variant>were closed
<variant>had been closed
<variant>was closing
<variant>is closed
<variant>will be closed

<question> The boy ____ at home an hour before, if he ____ his school at one o'clock last Monday.

<variant>would have been / had left
<variant>would be / had left
<variant>was / would leave
<variant>had been / had left
<variant>has been / left

<question> If you ____ him yesterday he ____ you everything.

<variant>had asked / would have told
<variant>asked / told
<variant>has asked / will tell
<variant>asked / would tell
<variant>would ask / would have told

<question> If you ____ to me yesterday, we ____ this article.

<variant>had come / should have translated
<variant>came / shall translate
<variant>would come / should translate
<variant>come / having translated
<variant>were coming / should be translating

<question>She ____ if she ____ that she was ill.
<variant>wouldn't have gone out / had known
<variant>won't go out / knows
<variant>didn't go out / knew
<variant>hasn't gone out / has known
<variant>doesn't go out / knows

<question> "I ____ my work if you ____ me then. Thank you."
<variant>wouldn't have finished / hadn't helped.
<variant>shan't finish / don't help.
<variant>haven't finished / don't help.
<variant>don't finish / won't help.
<variant>didn't finish / helped.

<question>Emergency medical services ...
<variant>provide emergency care.
<variant>provide hospital care.
<variant>provide out-patient care.
<variant>provide exclusive care.
<variant>provide personal hygiene.

<question>Epidemiology investigates.
<variant>The cause of disease and control its spread.
<variant>The cause of illness and let the person go.
<variant>The cause of nausea and vomiting.
<variant>The cause of sickness and injuries.
<variant>The cause of being stout and fat.

<question>Maternal and child health ...
<variant>promotes the health of a pregnant woman and unborn child.
<variant>provides right for life of a pregnant woman and unborn child.
<variant>controls the spread of disease unborn child.
<variant>diagnoses the disease of a pregnant woman.
<variant>combines the policy and business of a pregnant woman.

<question>Define the Green Peace actions
<variant>stop hunting whales and killing baby seals
<variant>create masterpieces and sell in auction
<variant>discover and innovate new technologies
<variant>research new places and shoot programs
<variant>solve social problems and international conflicts

<question>People breathe in ...

<variant>oxygen

<variant>carbon dioxide

<variant>water so

<variant>foods

<variant>plants

<question> What does not refer to renewable energy?

<variant>energy came from coal, oil and gas

<variant>wind power from turbines

<variant>hydroelectric energy from rivers

<variant>geothermal power, taking heat from the center of the Earth

<variant>Solar energy from the sun
