Department "Medical Biophysics and Information Technologies"
Work program of the course "Information and Communication Technologies"
Educational program Educational program 6B10115 – "Medicine"

1.	General information about the course		
1.1	Course code: ICT 1105	1.6	Academic year: 2024-2025
1.2	Course name: Information and Communication Technology	1.7	Year: 1
1.3	Prerequisites: -	1.8	Term: 1
1.4	Postrequisites: Introduction to scientific research	1.9	Number of credits (ECTS): 5
1.5	Cycle: General Education Subjects	1.10	Component: Mandatory component
2.	Course content		
This course covers foundational concepts of information and communication technologies, including architecture of computer systems, types of software, database systems, data analysis and management, networking, cybersecurity, internet technologies, cloud technologies, multimedia technologies, smart technologies, AI fundamentals and its applications.			
3.	Form of summative assessment		
3.1	Testing 	3.5	Coursework
3.2	Writing	3.6	Essay
3.3	Oral	3.7	Project
3.4	OSPE / OSCE	3.8	Other (specify)
4.	Objective of the course		
To develop the ability to critically evaluate and analyze processes, methods of searching, storing, and processing information, and ways of collecting and transmitting information through digital technologies.			
5.	Learning outcomes		
LO1	Explain the purpose, content, and development trends of information and communication technologies, and justify the choice of the most suitable technology for solving specific tasks.		
LO2	Explain methods for collecting, storing, and processing information, and ways to implement information and communication processes.		
LO3	Describe the architecture of computer systems and networks, including the purpose and functions of key components.		
LO4	Utilize Internet resources, cloud services, and mobile applications for searching, storing, processing, and disseminating information.		
LO5	Apply software and hardware for computer systems and networks to collect, transmit, process, and store data.		
LO6	Analyze and justify the choice of methods and tools for information security.		
LO7	Develop data analysis and management tools for various activities using digital technologies.		
LO 8	Demonstrate the ability to apply the theory, methods, and principles of artificial intelligence in the use of basic intelligent software systems		
5. 1	Course LO	EP learning outcomes, which are related to the course learning outcomes	
	LO1 LO2 LO3	LO 1. Applies in practice fundamental knowledge in the field of biomedical, clinical, epidemiological and socio-behavioral sciences.	
	LO4	LO4. Effectively communicates with patients, their families and medical professionals on the basis of compliance with the rules of ethics and deontology, leading to an effective exchange of information and cooperation.

LO2	Explain methods for collecting, storing, and processing information, and ways to implement information and communication processes	Incorrectly explains methods for collecting, storing, and processing information. Does not understand how to implement information and communication processes.	Explains the methods in general terms but with errors. Can describe the basic ways of implementing processes, though with some shortcomings.	Explains the methods and ways to implement processes well, though some aspects may require clarification.	Fully and accurately explains methods for collecting, storing, and processing information. Confidently describes ways to implement processes.
LO3	Describe the architecture of computer systems and networks, including the purpose and functions of key components	Unable to accurately describe the architecture of computer systems and networks. Makes errors in identifying the purpose and functions of components.	Has a general understanding of system and network architecture, but makes mistakes. Can describe key components, though not always accurately.	Describes the architecture, purpose, and functions of key components well, though there are minor inaccuracies.	Clearly and accurately describes the architecture of computer systems and networks, as well as the functions of all key components.
LO4	Utilize Internet resources, cloud services, and mobile applications for searching, storing, processing, and disseminating information	Unable to effectively utilize internet resources, cloud services, and mobile applications.	Can use these tools at a basic level but with limited effectiveness.	Confidently uses internet resources and applications, though there is room for improvement.	Effectively and confidently uses all listed tools to accomplish tasks.
LO5	Apply software and hardware for computer systems and networks to collect, transmit, process, and store data	Unable to properly use software and hardware.	Can use software and hardware, but with limited effectiveness.	Confidently applies software and hardware, though there are minor shortcomings.	Fully proficient in applying software and hardware to accomplish all tasks.
LO6	Analyze and justify the choice of methods and	Unable to analyze or justify the choice of methods and tools.	Can perform a basic analysis and justification, but with errors.	Analyzes and justifies choices well, though there are some	Thoroughly analyzes and convincingly justifies the choice

LO7	Develop data analysis and management tools for various activities using digital technologies	Unable to develop effective tools for data analysis and management.	Can develop basic tools, but with limited functionality.	Develops functional tools, though improvements.	Develops high-quality and effective tools for data analysis and management.
LO8	Demonstrate the ability to apply the theory, methods, and principles of AI in the use of basic intelligent software systems	Does not demonstrate understanding or ability to apply AI theory and methods.	Understands basic principles but struggles to apply them.	Confidently applies AI theory and methods, though with some inaccuracies.	Fully and accurately applies AI theory, methods, and principles in the use of software systems.

10.2. Criteria for assessing

Checklist for assessing practical class

Form of Work	Criterion	Description	Points (max 100)
Testing (20 points)	Quality of Answers	All answers are correct	17-20
		Most answers are correct, but there are errors	12-16
		Partially correct answers	7-11
		Many incorrect answers	0-6
Completion of Individual Computer Task (60 points)	Completeness of Task	Fully completed with correct results	50-55
		Completed, but with minor errors	35-49
		Partially completed with significant errors	20-34
		Task completed partially or with multiple errors	0-19
	Adherence to Deadlines	On time	5
		Late	0
Participation in Discussion (20 points)	Activity in Participation	Active participation, constructive comments	5-10
		Participation with minimal comments	3-4
		Passive participation or lack of constructive comments	0-2
	Quality of Argumentation	Clearly formulated and justified arguments	5-10
		Arguments present but not always justified	3-4
		Arguments absent or unconvincing	0-2

Form of Work	Criterion	Description	Points (max 100)
Flowchart of computer devices (Lucidchart tool) (40 points)	Accuracy of the Flowchart	The flowchart is fully accurate and reflects all necessary components and processes	20-25
		The flowchart is mostly accurate, but there are minor errors	15-19
		The flowchart has significant errors, with some components and processes missing	5-14
		The flowchart is inaccurate or incomplete	0-4
	Readability and Design	The flowchart is clearly designed in Lucidchart, all elements are easily readable and logically connected	10-15
		The flowchart is generally readable, but there are minor design flaws	5-9
		Readability and design hinder understanding of the flowchart	0-4
Database (MS Access) (60 points)	Tables	All necessary tables are created, properly structured, and relationships between tables are established	15-20
		Tables are created, but there are errors in structure or not all relationships are correctly set	10-14
		Tables are partially created, with significant errors in structure and relationships	5-9
		Tables are missing or incorrect	0-4
	Forms	All necessary forms are created, functional, and user-friendly	7-10
		Forms are created, but their functionality or design needs improvement	4-6
		Forms are partially created or incorrectly designed	0-3
	Queries	Queries are correct, efficiently retrieve and process data	10-15
		Queries are created but work inefficiently or contain errors	5-9
		Queries are partially created or incorrect	0-4
	Reports	Reports are created and accurately display query results and data	10-15
		Reports are created, but their content or format needs improvement	5-9
		Reports are missing or incorrect	0-4

		The description is mostly clear but lacks some details	10-14
		The description is vague or missing significant parts	5-9
		The description is unclear or incomplete	0-4
	Accuracy of the Flowchart	The flowchart accurately represents the network topology as described	15-20
		The flowchart is mostly accurate but contains minor errors	10-14
		The flowchart has significant errors or omits key elements	5-9
		The flowchart is inaccurate or incomplete	0-4
	Justification of Decisions	The choices for network design are well-justified with logical reasoning	5-10
		Justification is provided, but it requires improvement	3-4
		Justification is missing or unconvincing	0-2
Report “Comparative analysis of anti-virus means of information protection” (MS Word) (50 points)	Study of Antivirus Functionality	The functionality of antivirus programs is thoroughly and correctly studied	15-20
		The functionality is studied, but there are omissions or minor errors	10-14
		The functionality is partially studied with serious errors	5-9
		The functionality is not studied or the work is incorrect	0-4
	Comparative Analysis	The comparative analysis of antivirus programs is clear, logical, and well-founded	15-20
		The analysis is conducted, but with insufficient detail or errors	10-14
		The analysis is partially conducted or has significant errors	5-9
		The analysis is missing or completely incorrect	0-4
	Quality of Report Presentation	The report is clearly presented, includes all necessary elements, tables, or diagrams	5-10
		The presentation is generally good, but there are minor issues	3-4
		The presentation makes it difficult to understand the content of the report	0-2

12. Course Policy and Requirements

- 1. Attendance:** Regular attendance is mandatory. Students must attend at least 80% of the classes to qualify for the final examination. Participation in all scheduled activities, including practical tasks and SIWs is essential.
- 2. Assignments and Projects:** All assignments and projects must be submitted on time. Late submissions will incur penalties unless prior arrangements have been made with the instructor. Assignments must meet the specified criteria and be submitted in the required format.
- 3. Examinations and Assessments:** Two midterm assessments will be conducted during the semester, on the seventh and fourteenth weeks, respectively. Passing these midterm assessments is mandatory for eligibility to sit for the final exam. The results of the midterm assessments will be sent to the Dean's Office in the form of a report at the end of the assessment week. Both midterm controls will be conducted under strict examination conditions, and any form of academic dishonesty will result in severe consequences.
- 4. Grading Policy:** The final exam grade will be calculated as the sum of the current assessment grade and the final exam grade. The current assessment includes grades for each practical class, completion of student independent work, and results of midterm controls, accounting for 60% of the overall grade. The final exam accounts for 40% of the overall grade. To pass the course, students must achieve a minimum overall score of 50%.
- 5. Communication:** Students should regularly check the course's online platform (Platonus, Whatsapp chat) for announcements, assignment details, and other important information. Queries and communications should be directed through the official communication channels provided by the instructor.
- 6. Academic Integrity:** Students are expected to uphold the highest standards of academic integrity. Plagiarism, cheating, and other forms of academic dishonesty will not be tolerated and will result in disciplinary action.
- 7. Technology Requirements:** Students must have access to a computer with the necessary software installed. Reliable internet access is also required for completing online assignments and participating in virtual classes.
- 8. Behavioral Requirements:** Students are expected to show respect and courtesy towards both the instructor and their classmates. Tolerance and appropriate behavior in the learning environment are required. Medical students must wear white coats and medical caps during classes.
- 9. Support and Resources:** If you encounter difficulties with the course content or assignments, seek help early. Resources such as office hours, tutoring sessions.
